Personal Bio Summary

My career started from working on small ecommerce projects on my own. Over the past seven years, I have ran two Top Rated eBay stores and built my own ecommerce platform, 35Moving.com, where I resold sneakers and socks. While operating these stores, I worked as a keyholder at Bath And Bodyworks where I managed employees and assisted eleven stores across South Atlanta with their inventory systems. I now work at Flock Safety as a Deployment Product Speacialist.
